### Short History and more interesting info

I was born in Arusha Tanzania and lived in different cities but since 2017 I decided to stay in Arusha till now.

I have different responsibility in school and society, from school I able to management school and class. Here are responsibilities as head teacher I have

- 1) General administrator of the school
- 2) Coordinates the information between the school, parents and supporters
- 3) Attends meetings concerning education at award, district and region level
- 4) Making sure there are a peace and security in the school
- 5) As the main chief supervisor of all administrative and managerial activities in the school.

As a class teacher here are the responsibility:

- 1) Smartness must be sustained by everybody, Ensure that open windows are held firmly on their shutters, No loitering in the school compound during school hours
- 2) As developing sport and art teacher in class 1, I should make sure pupils they able to playing local familiar games, performing physical exercises and playing ball games
- 3) Even in Reading subject, they should be able to introducing oneself, others and saying goodbye. Phonics by reorganizing letters and form new words.

I am the first born in my family with two 2 young brothers ,And I choose to teach because I rise by one parent and when I was young I see a lots of children's who did not have a chance to go to school with different aspect and one of them is the teachers who are using sticks and hard punishment in school and make children's to not love school, so I decide to be a teacher to change that perception that not every teacher are bad and not every school are bitten by teaching pupils without beating .

From now I only have one job in school here and nothing extra job, and the most thing I like most about my job it to get chance of learning every day, every day pupils comes with new behavior and it not like challenges but it also the most thing I like and I love to teach when it wrongs.
